Fatima Ahmed

Full Stack Developer

fatima.ahmed.muhsin@gmail.com | fatimahmed.com | @fatymahmed | LinkedIn | GitHub

🧠 SKILLS

HTML | CSS | Bootstrap | JavaScript | Ruby | Ruby on Rails | React | Redux | RSpec

Capybara | Jest | Git version control | PostgreSQL | SQLite3 | C++

💼 RELEVANT EXPERIENCE

X-team, *Software developer Intern*   Mar 2020 – Apr 2020
- Developed a RESTFUL API and authentication feature for a monthly budget tracking   Remote
  app using MERN stack.
- Pair programmed with two senior developers to write clean, clear and optimized code.

Microverse, *Technical Support Engineer and Mentor*   Nov 2019 – present
- Reviewed 350+ pull requests in HTML/CSS, Ruby, Ruby On Rails, React &   Remote
  Javascript for over 100+ students and provided specialized technical advice
  and guidance to multiple students over 1:1 video calls.

Swahilibox, *Software Developer Intern*   Jul 2018 – Sep 2018
- Developed a Ruby on Rails web app that allowed users to easily create events   Kenya
  and posts for a local hub.
- Led a team of 10+ participants during a UNESCO game jam; our group was
  ultimately voted "Best Team."

Softtech, *Software Developer*   Sep 2017 – Jun 2018
- Led a team of four developers while developing a Named-Entity Recognition   Turkey
  web app for a Turkish banking domain.

🗂 PROJECTS

Facebook Clone   GitHub | Live
- A Rails social media app designed to mimic Facebook's core features. Features
  include authentication, posts, comments, likes, messages, and friend
  requests.

Conference Schedule   GitHub | Live
- A React and Redux app with a Rails API that allows users to find information
  on upcoming conferences and add them to their schedule.

🎓 EDUCATION

Microverse, *Student*   Jul 2019 – present
- Spent 1500+ hours mastering algorithms, data structures, and full-stack   Remote
  development while simultaneously developing 20+ projects in Ruby, Rails,
  Javascript, React, Redux and HTML/CSS.
- Developed remote pair-programming skills and using Github.

Middle East Technical University, *Bachelor of Science in Computer Engineering*   Sep 2014 – Jan 2019
- Covered a wide range of topics like embedded systems, computer   Ankara, Turkey
  organization, logic design and Human-Computer Interaction.
